

FAASTeam presents:

Managing Unexpected Events and Airmen Certification Standards

We (humans) are subject to a “startle response” when we are faced with unexpected emergency situations and may delay action or initiate inappropriate action in response to the emergency. Training and preparation can reduce startle response time and promote more effective and timely response to emergencies. Fatal general aviation accidents often result from inappropriate responses to unexpected events. This presentation will acquaint you with the elements and benefits of Effective Unexpected Event Management. We’ll look at examples of accidents caused by mis-managing an unexpected event and suggest some strategies for what to do and what to practice to be ready when the unexpected occurs. During this presentation the audience will become acquainted with the Airman Certification Standards which will replace the Practical Test Standards familiar to Flight Instructors and DPEs.

Directions: See attached map.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
